- Header:** "ROAM v1.0" logo, "For more information call (781) 993-9193 or click here".
- Navigation Bar:** Home, Company Overview (highlighted), Products, FAQ, Contact Information.
- Left Sidebar:** "Take the Guided Tour click here" button with a cursor icon pointing to it, and a thumbnail image of the tour interface.
- Content Area:**
 - Section Header:** "Company Overview"
 - Text:** BEI Software develops Web-based solutions that allow corporations to maximize business profits by redeploying and recovering investments in idle or surplus assets. Our product, Return On Asset Maximizer (ROAM™) v1.0, allows corporations to avoid unnecessary purchases of new capital assets when the same assets are available elsewhere within an organization. It integrates with a company's current asset management systems to enable a more efficient redeployment of idle capital assets across divisions and geographic lines. As companies continue to face pressure to achieve more efficient operations, and with the global economy resulting in increased expansion and consolidation, ROAM v1.0 can save billions of dollars.
 - Right Sidebar:** "Company Overview:" with links to Technology Overview, Management Team, and Careers.
- Footer:** "Home | Company Overview | Products | FAQ | Terms & Conditions | Contact Info | Guided Tour".

FIGURE 2(B)

The screenshot shows a computer browser window displaying the ROAM v1.0 website. The title bar of the browser reads "ROAM v1.0". The main content area features a dark header with the ROAM logo and a navigation menu with links for Home, Company Overview, Products (which is highlighted in blue), FAQ, and Contact Information. Below the menu, a section titled "About ROAM v1.0" is displayed. On the left side of this section, there is a call-to-action button with the text "Take the Guided Tour" and a link "click here". To the right of the main text, there is a sidebar titled "More about ROAM:" with three bullet points: "Key Features", "Top Benefits", and "Technology". At the bottom of the page, there is a footer with links to Home, Company Overview, Products, FAQ, Terms & Conditions, Contact Info, and Guided Tour.

About ROAM v1.0

Take the Guided Tour
click here

Return On Asset Maximizer (ROAM) v1.0 is a web-based, integrated, and rapidly deployable solution that makes it easy for companies to manage, access, and acquire a tailored, global selection of used and surplus assets.

The global market for used and surplus goods is \$350 billion, according to a Tradeout.com study, and is derived from sales through brokers, classified sales, auctions, direct sales, and exchanges. While the \$350 billion market is impressive, we believe it is literally the "tip of the iceberg." The real market size is much greater, but because of inefficiencies and the lack of infrastructure, much of a company's surplus or idle assets never get redeployed, sold, or disposed of in a timely manner. According to our research, we estimate that 5-10% of a typical company's equipment assets are idle or surplus. For large companies, these assets could represent hundreds of millions of dollars.

ROAM v1.0 is designed to help companies avoid unnecessary purchases of new capital assets when the same assets are available elsewhere within the organization. As corporations continue to face pressure to achieve more efficient operations, and with the global economy resulting in more expansion and consolidation, businesses need a better means of tracking and redeploying capital assets across divisions and geographies. These assets may come from a variety of activities, including mergers and acquisitions, equipment upgrades, and machinery recalls and replacements.

Furthermore, companies typically lack an efficient mechanism for finding surplus assets outside of their domain. This process can sometimes take weeks or months. Since companies frequently have no choice but to buy new, they are failing to take advantage of the opportunity to save millions of dollars by better redeploying their own assets or by buying surplus from others.

The ROAM v1.0 infrastructure provides a solution to all of these problems. It allows large and medium-sized firms to redeploy their idle and surplus assets efficiently, assists in the sale and disposal process, and provides the resources to easily locate and buy from an internal and external aggregation of idle and surplus inventory items.

FIGURE 2(C)

The screenshot shows a web browser window with the ROAM v1.0 logo at the top left. At the top right, there is a link to call (781) 993-9193 or click here. Below the header, there is a navigation bar with links for Home, Company Overview, Products, FAQ, and Contact Information. A sidebar on the left contains a button to 'Take the Guided Tour' with a 'click here' link and a small thumbnail image. The main content area features several sections with headings like 'About ROAM v1.0', 'Internal Trading Communities', 'Ad Hoc Trading Groups', 'Public Marketplaces', 'Customization', 'Integration', 'Complements Existing Solutions Providers', 'Tools', and 'Reports'. Each section contains descriptive text. A 'More about ROAM:' box on the right lists 'Key Features', 'Top Benefits', and 'Technology'. At the bottom, there is a footer with links to Home, Company Overview, Products, FAQ, Terms & Conditions, Contact Info, and Guided Tour, along with a copyright notice.

FIGURE 2(D)

The screenshot shows a Windows-style browser window with a toolbar at the top. The main content area displays the ROAM v1.0 website. At the top right, there's a message: "For more information call (781) 993-9193 or click here". Below the header, there are five navigation links: Home, Company Overview, Products, FAQ, and Contact Information. On the left, a sidebar features a button labeled "Take the Guided Tour click here" with a small thumbnail image of the tour interface. To the right, a box titled "More about ROAM:" lists three items: Key Features, Top Benefits, and Technology.

Top Benefits of ROAM v1.0

Return on Asset Maximizer (ROAM) v1.0 offers a host of time- and money-saving benefits to participating companies. Our goal in building ROAM v1.0 was to create a working environment that dramatically exceeds current mechanisms for redeploying and acquiring surplus and idle assets. By implementing ROAM v1.0, your organization will be positioned to

1. Redeploy surplus and idle assets within and across divisions, geographies, and select trade groups.
2. Save substantial amounts of money on capital acquisition
3. Recover value on unused assets.
4. Remove fully depreciated or idle assets off the books.
5. Reduce the time your company spends searching for assets while providing both private and public asset listings.
6. Increase purchase leverage through the aggregation of capital spending
7. Integrate the listing and approval of assets with your existing Inventory Management, Purchasing, and Logistics systems.
8. Create private, secure trade groups that include your existing partners, brokers and exchange relationships. ROAM v1.0 also allows internal and external asset consumers to receive proactive notices regarding asset availability
9. Generate reports to validate the success of your investment recovery activities.
10. Facilitate or adapt to reorganization, consolidation, or merger & acquisition activity

FIGURE 2(E)

The screenshot shows a Windows desktop with a browser window open to the ROAM website. The browser's address bar contains the URL "http://www.roamsoft.com". The page title is "Technology". At the top right, there is a message: "For more information call (781) 993-9193 or click here". Below the header, there is a navigation menu with links to "Home", "Company Overview", "Products", "FAQ", and "Contact Information". On the left side, there is a sidebar with a button labeled "Take the Guided Tour click here" with a cursor icon pointing at it. The main content area starts with a section titled "Technology". It includes a paragraph about BEI's patent-pending search and aggregation technology, mentioning its history and application to B2B markets. To the right of this paragraph is a box titled "More about ROAM:" containing links to "Key Features", "Top Benefits", and "Technology". Below the main content, there is a section titled "The following characteristics make our technology unique" followed by a bulleted list of five features: Proven Scalability, Highly Optimized Proprietary Search Engine, Automated Aggregation Technology, and Real-Time Category Normalization. At the bottom of the page, there is a footer with links to "Home", "Company Overview", "Products", "FAQ", "Terms & Conditions", "Contact Info", and "Guided Tour".
